“

It is days like today when I am writing contracts for two projects and I get it done in three hours that I am so thankful for PASKR. Thanks for you and your team's hard work on a great software package. Time is money, and PASKR has allowed me the time to meet with another client face to face today instead of being stuck in the office doing paperwork.

Only a former project manager and estimator would understand.

PAT'S STORY

OVER 25 YEARS OF CONSTRUCTION EXPERIENCE

“

Construction has always been a way of life for me. My interest started as a small kid toting lumber. By eighteen, I worked for myself as a subcontractor framing houses, and to pay for college, I became a trim carpenter doing high-end staircases and custom moldings. I started my own commercial General Contracting firm only a year and a half out of college.

I still have the first tool belt I bought when I was in college - I use it to this day. There was a special feeling in pulling that leather pouch and belt on and cinching it up tight to hold the weight of all tools scattered at the bottom of those two large pouches with all the special nooks; with caulk and paint smears all along the way. That leather pouch had such a unique patina - it is a diary of my work. It tells my story; in actual sweat and bloodstains.

I am still a builder today, but now I construct and refine Project Management processes using software as one of the tools in my digital pouch. I started PASKR with the proceeds from selling my commercial construction company. It was a tremendously scary and exciting experience to change careers after so many years, but I knew with my experience in the field, I could make a difference for General Contractors everywhere. It is not just about a simple feature set that the program holds; it is my goal to create a program that is unique, simple, and impactful not only to your bottom line; but to the quality of your day. ”

A handwritten signature in black ink that reads "Pat Wheeler". The signature is written in a cursive, flowing style with a long horizontal stroke at the end.

“ I am THRILLED with the PASKR system. Just a simple click, click, click and I’m done. I couldn’t be happier. No more running around to get releases notarized, no more faxing invoices (hoping they will get in the right hands) and no more mailing the originals!! Your system is fast, efficient and saves paper. ”

SAVED PER PROJECT

I wanted to let you know that using the PASKR software has been a time saver for me. I have been very satisfied with the navigation of the system. I have used other construction software, and PASKR is much more efficient and easier to use. We try to keep things simple here while providing the best service for our customers; I hope more contractors will use this software in the future. ”
